CV Landscape Conservation Project

LCC-Supported Landscape Conservation Designs

The Vision of the LCC Network is "Landscapes capable of sustaining natural and cultural resources for current and future generations." To proactively pursue this Vision, the LCCs develop landscape conservation designs as mechanisms for identifying, designing, and delivering (through partners) an ecologically connected network of landscapes and seascapes adaptable to global change.

This mapper provides unified information about the suite of landscape conservation designs that are supported by the LCCs and that demonstrate key [Characteristics](#).

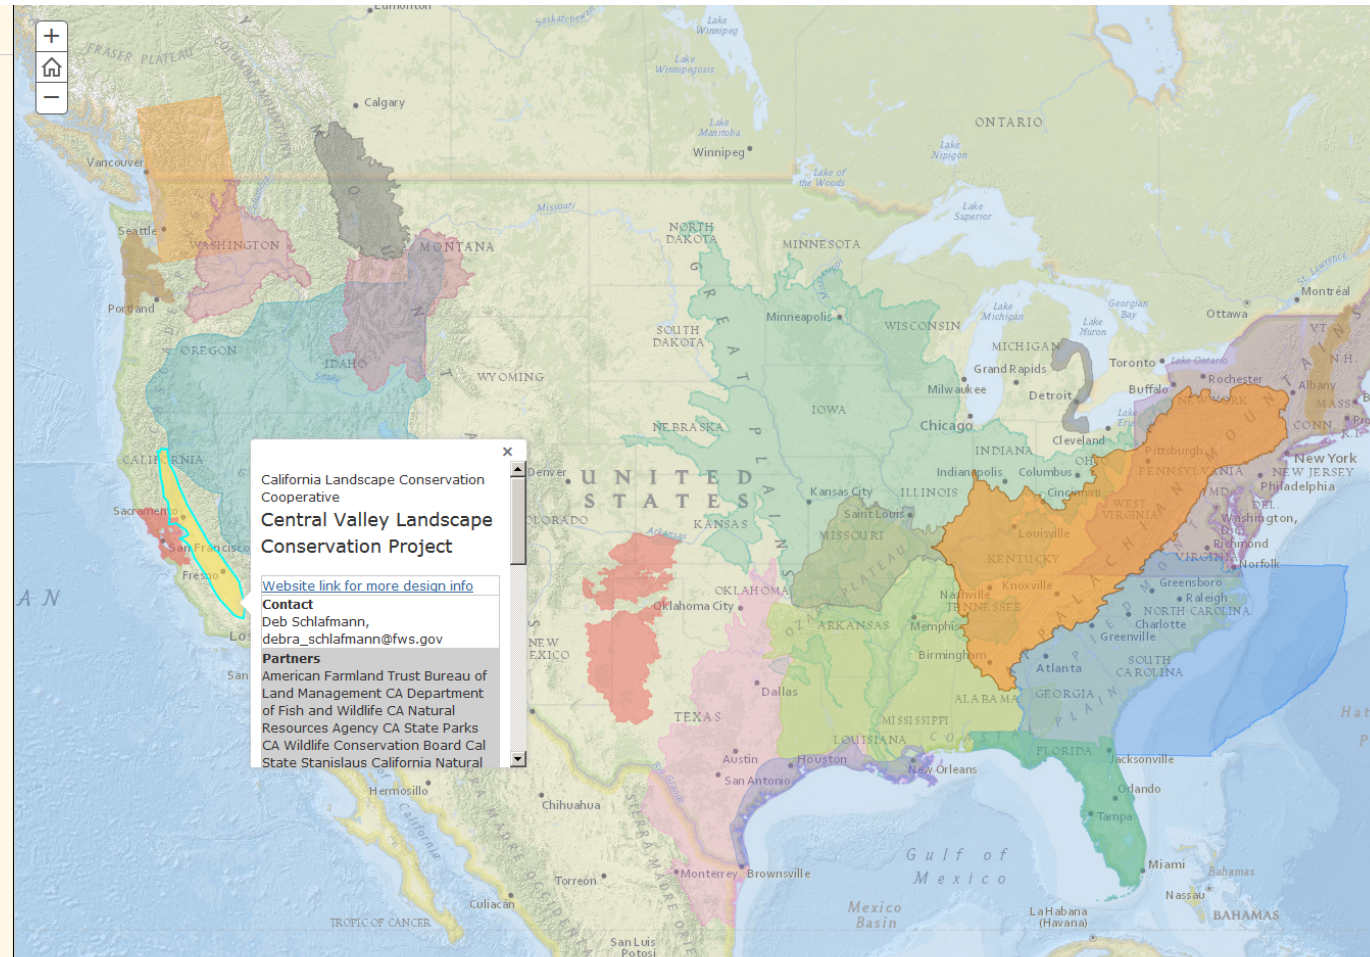

For more information please contact [Ben Thatcher](#) or [Matt Heller](#).

Please note that boundaries are subject to change as projects are further developed.

Appalachian LCC

Appalachian LCC Landscape Conservation Design

The Appalachian LCC's LCD is a comprehensive and scientifically defensible conservation planning exercise with multiple stakeholder and feedback loops to incorporate the best available science and feedback of

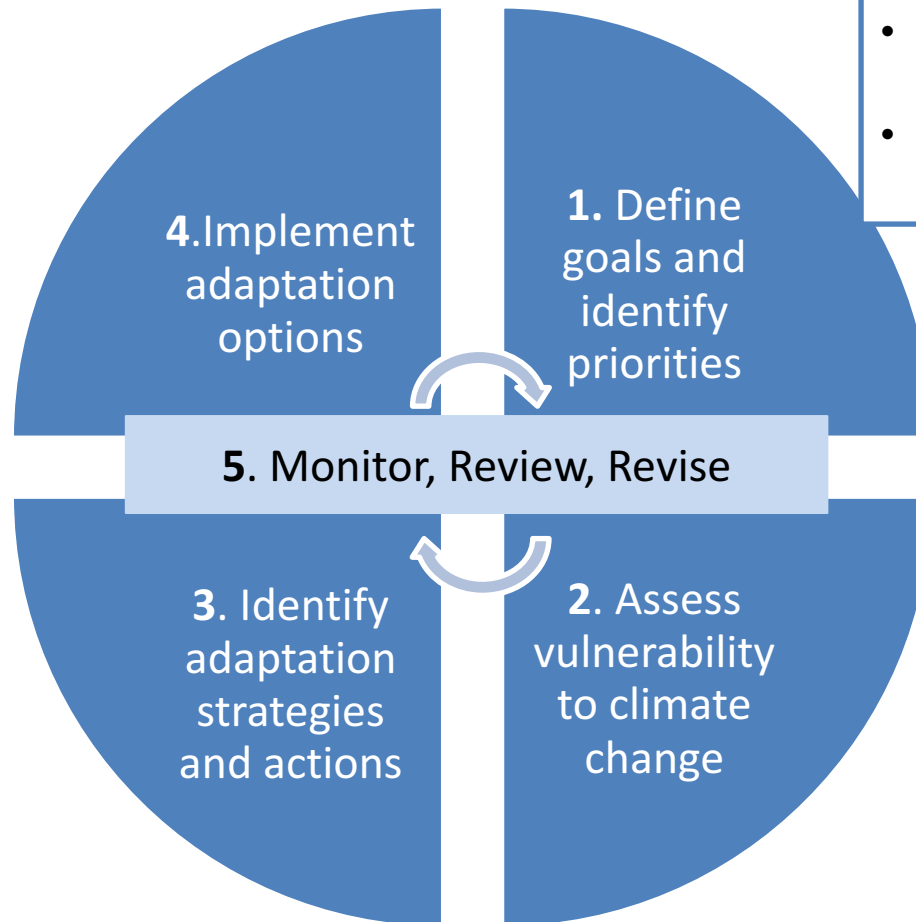

CV Landscape Conservation Project Overview

- 32 Partners
- Project teams
 - Leadership team
 - Project development team
 - Data management team
- Approach: Climate Smart Cycle
- Timeline: October 2014 - 2018

CV Landscape Conservation Project

Climate Smart Cycle

- Oct 2014. Kick-off meeting
Goals and objectives
- March 2015. Future scenario
- June 2015 Priority natural resources

CV Landscape Conservation Project

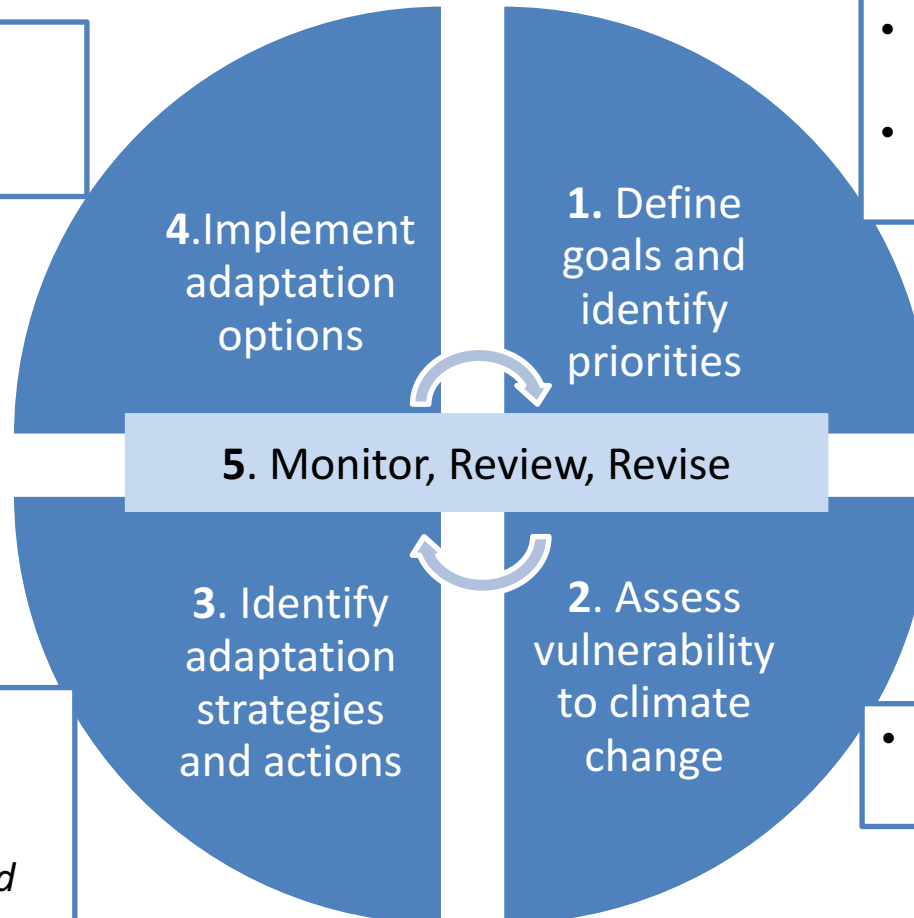

Priority Natural Resources

Habitats	Species Groups	Species
Chaparral & Serpentine Shrublands	Amphibians	Blunt-nosed Leopard Lizard
Dunes	Breeding Waterbirds & Shorebirds	California Tiger Salamander
Flooded Croplands	Burrowing Mammals	Green Sturgeon
Grasslands	Cavity Nesters & Roosters	Pacific Lamprey
Oak Woodlands	Dragonflies & Damselflies	California Red-legged Frog
Permanent Wetlands	Large Wide-ranging Mammals	Tricolored Blackbird
Rice Croplands	Riparian Birds	Valley Oak
Riparian Vegetation/Natural Riverbank	Salmonids	Yellow-legged Frog
San Joaquin Desert	Vernal Pool Crustaceans	Yellow-billed Magpie
Seasonal Wetlands	Bumblebees & Other Insect Pollinators	
Stream Channel	Wetland-dependent Mammals	
Vernal Pools & Swales	Wetland-dependent Reptiles	
	Wetland-obligate Plants	
	Wintering Waterbirds & Shorebirds	

CV Landscape Conservation Project

Climate Smart Cycle

?

- Oct 2014. Kick-off meeting
Goals and objectives
- March 2015. Future scenario
- June 2015 Priority natural resources

- October 2015. Vulnerability assessments

- May 2016. Identify Strategies and actions
- May 18-19, 2017. *Prioritize Strategies and actions*
