7-9 Agenda

- Review Outreach Calendar
- Edit PAD Brochure
- Plan Outreach Event at Fall Steering Committee Meeting

7-9 Meeting Minutes:

Review Outreach Calendar

(https://docs.google.com/spreadsheets/d/1tZQ9SJV0sj40CxgL_T6MSG6vF3ZUwgBWmEop81JMmHQ/edit#gid=0)

The group reviewed the forum outreach calendar, which is for members to add events they are attending to track and structure forum presence at events and connect members with materials to bring to those events. This is not a busy time of year, and members believe the calendar is up to date.

Edit PAD Brochure

Since there are no immediate events coming up that we will be bringing the PAD brochure to, and since Anne should be involved in the editing process, the group agrees to wait to make edits to the brochure until Anne is back from maternity leave in October. We will make edits and finalize the brochure at that point; however, some preliminary suggestions include:

- Replace the image of the road map on the cover with an image of fish or barrier.
- Ensure all text is accurate and up to date.
- Replace image of query function, since that has been updated.
- Change the panel about the Forum. Since the PAD is not really a forum product, that panel could be removed, and the sources of support for the PAD that should be referenced are CDFW, Caltrans, PSMFC, USFWS and the Forum.

Planning Field Trip, Outreach Event for Fall Steering Committee Meeting

The group built on the preliminary plan discussed at the Governance Committee meeting earlier this morning, this being: An outdoor event centered around the Greater Sacramento area, that is open to the public, and involves a few project site visits, and speakers.

Current Plan- Education and Outreach Committee ideas in BLUE

Possible Speakers

- Jacob Katz with CalTrout
- Peter Moyle present about native fishes.
- Lots of potential speakers from UC Davis.
- [Rachel Johnson or Carson Jefferies at UC Davis](#)
- [Natalie Stauffer-Olsen and Renee Henry TU on the Floodplain forward project](#)

Suggestions for Projects:

- Yolo Bypass Recreation Area
- Fremont Wier Big Notch Project
- Sacramento Wier
- [Willow Bend project tide-gate, which was not successful, could be a good opportunity to showcase lessons learned, rather than only highlighting successful projects.](#)
- Cosumnes River Preserve, Gena has volunteered there. <https://www.cosumnes.org/>. 33 minutes south of Sacramento.

Project/Location Suggestions not chosen for this event

- Daguerre Point damn in Yuba, Natalie just co-authored a paper that shows there is a genetically unique Tube Spring run fish. TU could present on that.
- Sunset Dam on the Feather River. CDFW priority, though private landowner access may be tricky.

Holly will send out emails asking the forum to choose between the November and December dates, and encouraging people interested in planning the outreach event to join the next Education and Outreach Committee meetings. Holly will also send an email out to the new state parks members as well as the existing committee members to plan our next meeting times.
